

## REMARKS

The foregoing amendments have been made preliminary to the examination of this application in order to present the application with the proper recommended headings, paragraph numbering, corrected claim dependency, and a proper Abstract, all consistent with current U.S. practice and procedures. As the amendments to the specification have been made via a substitute specification wherein changes are underlined and stricken through, a clean copy of the substitute specification is appended hereto as Exhibit A. References in the original specification to claims by number (which now appear under the Background and Summary section headings) have been deleted and, where appropriate, the actual language of the claim has been inserted. The substance of the application has not been changed and no new matter has been added.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Karl S. Sawyer, Jr.', written in a cursive style.
